

Final Minutes
EIIP Co-Chairs Conference Call
November 26, 2002

Research Triangle Park, North Carolina

ATTENDEES

The following people were on the call:

Dennis Beauregard, Steering Committee
Chuck Mann, Area Sources Committee
Roger Westman, Steering Committee
Gene Tierney, Mobile Sources Committee
Greg Stella, Emissions Modeling Committee

COMMITTEE REPORTS

Area Sources Committee

There was little to report during the past month since the Committee has no active projects. This was Chuck's last Co-chairs conference call. He will be retiring at the end of December and we wish him well.

Emissions Modeling Committee

The Committee has completed its work on the 1st Phase of the spatial allocation project. Since there was little support for the 2nd Phase of the project, the Committee is now discussing other projects to pursue during FY-03.

Mobile Sources

Kansas City PM Fine Testing

I provided an update on the Kansas City PM Fine Project since I had just participated in a conference call conducted by OTAQ for the EIIP Mobile Sources Committee members. The project is under development and is scheduled to begin in the Spring. EIIP is funding the speciation work. A copy of the proposed project outline which includes detailed information on the compounds for analysis has already been circulated to EIIP MSC members as well as the Steering Committee. Anyone wishing to submit comments on the compounds proposed for testing should do so very soon.

Nonroad Project

The Nonroad Project approved for funding at the Spring SAEWG meeting will be started during the Summer of 2003. Gene is traveling to Phoenix next week to meet with the Coordinating Research Council on project details.

OTHER BUSINESS

Progress on Projects for FY-03

As discussed earlier, the Mobile Source PM project is moving ahead. I've met with Tom Pierce, Bill Benjey and Jason Ching of ORD to discuss funding details of the Fugitive Dust/NH3 project. Tom Pierce has agreed to serve as project lead for the NH3 State of the Science Paper.

NEW BUSINESS

No new business was brought up.

NEXT CALL

The next call is scheduled for December 18, 2002 from 3:00 to 4:30 (919-541-4328).

Dennis Beauregard, Coordinator
